Eric -

Let's wait until Monday so I can match this up with Jennifer's plots.
I'm not thinking very clearly at the moment.

- Mike

Subject: PCB 126

Attached is a screenshot from QM of the PCB 126 concentrations relative to the two PRGs we are mapping - 0.042 ug/kg and 0.0064 ug/kg. I really do not see the issue with detection limits. Cans someone clarify this for me?

Thanks, Eric
